Subject Index

Absorption
Review of Multidirectional Active Wave Absorption Methods, 1309
Tensile Characteristics of Palladium Exposed to Hydrogen (Deuterium), 237
Waves inn Rectangular Inlet with Reflecting or Absorbing Walls, 1333

Accident data
Commuter Cyclist Accident Patterns in Toronto and Ottawa, 1178
Identifying Root Causes of Construction Accidents, 176
Moving Toward a Zero Injury Objective, 220

Accident prevention
Moving Toward a Zero Injury Objective, 220
Multiobjective Methodology for Highway Safety Resource Allocation, 811

Accident risks
Daylight Savings Time Changes and Construction Accidents, 221
Performance Problems and Structural Retrofit Analysis of Existing BCTs, 973

Accidents
Commuter Cyclist Accident Patterns in Toronto and Ottawa, 1178
Daylight Savings Time Changes and Construction Accidents, 221
Identifying Root Causes of Construction Accidents, 176

Accounting
Avoiding Overload, 1414

Accreditation
Construction Engineering and Management Undergraduate Education, 191
Course Refinement through Outcome Assessment: A Case Study, 983
Professional Program Criteria for Civil Engineering Curriculums, 999

Accuracy
Precomputing Influences of Observation for Network, 1166

Acetate
Effect of HRT on Mesophilic Acidogenesis of Dairy Wastewater, 546
Intracellular Polymers in Aerobic Sludge of Sequencing Batch Reactors, 492

Acids
Effect of HRT on Mesophilic Acidogenesis of Dairy Wastewater, 546
Effect of pH and VFA Concentrations on Anaerobic Hydrolysis of Organic Solid Waste, 536
Factorial Study of Metal Effects on Acid Neutralization by Cement, 516
Field-Scale Observations of Arsenic and Boron in Soil Irrigated with Drainwater, 840
Turbulence-Driven Metal Release from Resuspended Pyrrhotite Tailings, 649

Acoustic detection
Acoustic Tomographic Imaging of Concrete Infrastructure, 796
Assessing Damage in Corroded Reinforced Concrete Using Acoustic Emission, 273
Estimating Bottom Stress in Tidal Boundary Layer from Acoustic Doppler Velocimeter Data, 691
P-Wave Arrival Determination and AE Characterization of Concrete, 262

Acoustic waves
Evaluation of Sonochemical Destruction of PCE in In Situ Flushing Waste Fluids, 531
P-Wave Arrival Determination and AE Characterization of Concrete, 262

Acoustics
Noise Control and Speech Privacy Guidelines for Office Building Design, 43

Acquisition
A Few 'Lessons Learned' from Acquisitions, 894
Project Procurement System Selection Model, 192
Return of the Master Builder, 1428

Activated carbon
As(III), As(V), Hg, and Pb Removal by Fe-Oxide Impregnated Activated Carbon, 511
Carbon Fiber Adsorption Using Quantitative Structure-Activity Relationship, 510
Control of Incinerator Organics by Fluidized Bed Activated Carbon Adsorber, 524
Equilibrium Adsorption and Heat of Adsorption for Water Vapor and Activated Carbon, 434
Improvement of Submerged Biofilter Process by Bioelectrochemical Method, 470
PAC-Membrane Filtration Process. I: Model Development, 414
PAC-Membrane Filtration Process. II: Model Application, 415

Activated carbon filters
Analysis of Pressure Drops in Pleated Activated Carbon Cloth Filters, 473
Reduction of Indoor Radon by Air Cleaning—Case Study, 543

Activated carbon treatment
Contaminant Adsorption and Oxidation Via Fenton Reaction, 476

Activated sludge
Biological Removal of Gaseous VOCs from Automotive Painting Operations, 494
Microbial Activity: Mathematical Expression and Direct Determination, 412
Thermogravimetric Analysis of Activated Sludge Flocculated with Polyelectrolyte, 537

Active control
Active Pulse Structural Control Using Artificial Neural Networks, 342
Closed Loop Predictive Optimal Control Algorithm Using ARMA Models, 315

Designing a General Neurocontroller for Water Towers, 310
Nonlinear Sliding Mode Control of Seismic Response of Building Frames, 280
Optimal Placement of Actuators and Sensors for Floor Vibration Control, 1153
Semiactive Control Strategies for MR Dampers: Comparative Study, 337

Adaptive systems
Adaptive Control for Safe and Quality Rebar Fabrication, 185
Integrated Procedure for Identification and Control of MDOF Structures, 329

Adhesive bonding
Structural Characterization of Built-Up Timber Columns, 44

Administration
Benefits of Small Projects Team Initiative, 172

Admixtures
Alkali-Silica Reaction of Concretes with Admixtures of Concrete, 269
Corrosion Testing of Grout for Posttensioning Ducts and Stay Cables, 1018
Use of Phosphate Waste as Fillers in Mixtures to Improve Their Resistance to Deformation, 1225
Use of Pulverized Fuel Ash in Trench Backfill, 943

Adsorbents
Kudzu as a Medium for Adsorption of Heavy Metals in Dilute Aqueous Wastestreams, 1350

Adsorption
Alternative Sorbents for Removing MTBE from Gasoline-Contaminated Ground Water, 445
Analysis of Pressure Drops in Pleated Activated Carbon Cloth Filters, 473
As(III), As(V), Hg, and Pb Removal by Fe-Oxide Impregnated Activated Carbon, 511
Carbon Fiber Adsorption Using Quantitative Structure-Activity Relationship, 510
Competition of Cd, Cu, and Pb Adsorption on Goethite, 410
Contaminant Adsorption and Oxidation Via Fenton Reaction, 476
Control of Incinerator Organics by Fluidized Bed Activated Carbon Adsorber, 524
Equilibrium Adsorption and Heat of Adsorption for Water Vapor and Activated Carbon, 434
Field-Scale Observations of Arsenic and Boron in Soil Irrigated with Drainwater, 840
Kudzu as a Medium for Adsorption of Heavy Metals in Dilute Aqueous Wastestreams, 1350
Lead Removal in Fixed Beds by Recycled Iron Material, 409
Metal Bioavailability and Trivalent Chromium Removal in ABR, 483
Modeling of Aqueous BTEX Adsorption in Column and Multistage Adsorbers, 502
PAC-Membrane Filtration Process. I: Model Development, 414
PAC-Membrane Filtration Process. II: Model Application, 415
Removal of Lignin by Industrial Solid Wastes, 1360
Sorption Isotherms and Kinetics of Sediment Phosphorus in a Tropical Reservoir, 525

Advection
Centrifuge Modeling of Moisture Migration in Silty Soils, 622
Discrete Particle Distribution Model for Advection-Diffusion Transport, 703
Solute Transport Modeling in Overland Flow Applied to Fertigation, 819

Aeration
Aeration Performance of Rectangular Planform Labyrinth Weirs, 459
Full-Scale Demonstration of Improvement in Aeration Efficiency, 471
Mechanical Aerators' Power and Aeration Control in Bioreactors, 449
Modeling Artificial Aeration Kinetics in Ice-Covered Lakes, 405

Aerators
Mechanical Aerators' Power and Aeration Control in Bioreactors, 449
Modeling Artificial Aeration Kinetics in Ice-Covered Lakes, 405

Aerial photographic interpretation
Automatic Road Detection in Grayscale Aerial Images, 119

Aerial photography
Automatic Road Detection in Grayscale Aerial Images, 119

Aerobic processes
Chlorinated Solvent Cometabolism by Butane-Grown Mixed Culture, 517
Intracellular Polymers in Aerobic Sludge of Sequencing Batch Reactors, 492
Modeling Natural Attenuation of Fuels with BIOPLUME III, 455
Sorption Isotherms and Kinetics of Sediment Phosphorus in a Tropical Reservoir, 525
VFA Production in Thermophilic Aerobic Digestion of Municipal Sludges, 450

Aerobic treatment
Aerobic Thermophilic and Anaerobic Mesophilic Treatment of Sludge, 500
Anaerobic Thermophilic/Mesophilic Dual-Stage Sludge Treatment, 501
Thermophilic Aerobic Wastewater Treatment in Continuous-Flow Bioreactors, 493

Aerodynamic forces
Aerodynamic Stability of Long-Span Suspension Bridges under Erection, 1156

Aerodynamics
3D Flutter Analysis of Bridges by Spline Finite-Strip Method, 1139
Aerodynamic Coupling Effects on Flutter and Buffeting of Bridges, 242
Aerodynamics of Electrically Driven Freight Pipeline System, 1210
Bridge Deck Aeroelastic Admittance Revisited, 55
Sensitivity to Physical and Numerical Modeling in Navier-Stokes Simulations, 23
Special Studies for Vasco da Gama Bridge, 83
Theories of Aerodynamic Forces on Decks of Long Span Bridges, 56

Time Domain Flutter and Buffeting Response Analysis of Bridges, 241

Aeroelasticity

Theories of Aerodynamic Forces on Decks of Long Span Bridges, 56

Aerospace engineering

Design and Fabrication of FRP Grids for Aerospace and Civil Engineering Applications, 35

Africa

Water Distribution Management in Small West African Canal Systems, 857

Age factors

Modeling the Reduction in Load Capacity of Highway Bridges with Age, 93

Phosphate Inhibitors and Red Water in Stagnant Iron Pipes, 539

Aggregate gradation

Effect of Aggregate Size on Attenuation of Rayleigh Surface Waves in Cement-Based Materials, 379

Aggregates

Construction Use of Vitrified Chromium-Contaminated Soils, 1351

DCP Criteria for Performance Evaluation of Pavement Layers, 976

Flat and Elongated Aggregates in Superpave Regime, 930

Mechanical Properties of Fired Clay-Perlite as Composite Material, 921

Reuse of Industrial Sludge as Pelletized Aggregate for Concrete, 436

State of the Art. I: Resilient Response of Unbound Aggregates, 1185

State of the Art. II: Permanent Strain Response of Unbound Aggregates, 1186

Uniaxial Experiments on Idealized Asphalt Mixes, 947

Aggregation

Aggregation Rate of Fine Sediment, 735

Describing Water Quality with Aggregate Index, 458

Image-Based System for Particle Counting and Sizing, 433

Rainfall Disaggregation Using Artificial Neural Networks, 777

Aging

Assessment of Reliability of Aging Reinforced Concrete Structures, 1163

Modeling of Early-Age Creep of Shotcrete. I: Model and Model Parameters, 274

Modeling of Early-Age Creep of Shotcrete. II: Application to Tunneling, 275

Role of Interfaces in Controlling Durability of Fiber-Reinforced Cements, 913

Simulation of Construction of RCC Dams. I: Temperature and Aging, 1119

Simulation of Construction of RCC Dams. II: Stress and Damage, 1120

Agricultural wastes

Desert Wetlands, 1483

Neural Networks for Agrichemical Vulnerability Assessment of Rural Private Wells, 761

Scrape-and-Replace Method to Minimize Ammonium Transport from Animal Waste Lagoons, 1346

Seasonal Risk Analysis for Floodplains in the Delaware River Basin, 1289

Agriculture

Environmental Degradation and Vulnerability in Cuba, 1402

Selection of Irrigation Methods for Agriculture, 1559

Air conditioning

Design Guidelines for Replacement of Air-Conditioning Systems112-117, 972

Air entrainment

Minimum Submergence before Double-Entrance Pressure Intakes, 713

Wave Impact on Wall Using Pressure-Impulse Theory. I. Trapped Air, 1320

Wave Impact on Wall Using Pressure-Impulse Theory. II. Porous Berm, 1321

Air flow

Sensitivity to Physical and Numerical Modeling in Navier-Stokes Simulations, 23

Air injection

Removal of Dissolved- and Free-Phase Benzene Pools from Ground Water Using In Situ Air Sparging, 488

Air pollution

Analysis of Pressure Drops in Pleated Activated Carbon Cloth Filters, 473

Membrane Bioreactor for Cometabolism of Trichloroethene Air Emissions, 522

New Statistical Framework for Estimating Carbon Monoxide Impacts, 1231

Probabilistic Health Risk Assessment of Industrial Workers Exposed to Air Pollution, 1359

Air pollution control

Air Quality Planning and Empirical Model to Evaluate SPM Concentrations, 542

Electrostatic Precipitator for Metal and Particulate Emission Control, 430

Heat Transfer Model for Regenerative Bed, 514

Polyurethane Foam Medium for Biofiltration. I: Characterization, 504

Polyurethane Foam Medium for Biofiltration. II: Operation and Performance, 505

Air quality

Air Quality Planning and Empirical Model to Evaluate SPM Concentrations, 542

Reduction of Indoor Radon by Air Cleaning—Case Study, 543

Air temperature

Linear Air/Water Temperature Correlations for Streams during Open Water Periods, 779

Air transportation

The 2020 Vision of Air Transportation: Emerging Issues and Innovative Solutions, 1503

Simultaneous Service Approach for Reducing Air Passenger Queue Time, 1187

Air water interactions

Hurricane Wind Field Model for Use in Hurricane Simulations, 1136

Airfields

The 2020 Vision of Air Transportation: Emerging Issues and Innovative Solutions, 1503

Soil Mechanics and U.S. National Defense—A Mutually Beneficial Relationship, 623

Airlines

Model for Determining Airline Fares for Meeting or Convention Demand, 1191

Airport construction

The 2020 Vision of Air Transportation: Emerging Issues and Innovative Solutions, 1503

AIR-21, 1454

Branching Out (Available in Structural Engineering Special Issue only), 1444

Hoisting "Y" Columns at the Phoenix Airport Parking Garage Expansion, 1376

Making Way for Runways, 1471

Soil Mechanics and U.S. National Defense—A Mutually Beneficial Relationship, 623

Airport design

The 2020 Vision of Air Transportation: Emerging Issues and Innovative Solutions, 1503

Optimization of Runway Orientation, 1205

Airport runways

Earthquake Damage and Repair of Oakland Airport Runway, 975

Making Way for Runways, 1471

Optimization of Runway Orientation, 1205

Airport terminals

Branching Out (Available in Structural Engineering Special Issue only), 1444

Airports

AIR-21, 1454

Investment Risk Analysis in Airport Parking Facility Development, 207

Making Way for Runways, 1471

Simultaneous Service Approach for Reducing Air Passenger Queue Time, 1187

Alaska

Creation and Design of Energy Center, 97

Method for Attenuation of White Phosphorus Contamination in Wetlands, 528

Two-in-One Tunnel, 1437

Algae

3D Numerical Modeling of *Microcystis* Distribution in Water Reservoir, 519

Forecasting Cyanobacterial Concentrations Using B-Spline Networks, 133

Grazer Control of Stream Algae: Modeling Temperature and Flood Effects, 442

Algal control

Grazer Control of Stream Algae: Modeling Temperature and Flood Effects, 442

Growth of Floating Aquatic Macrophytes in Alkaline Industrial Wastewaters, 540

Algorithms

Evaluation of Some Data Transfer Algorithms for Noncontiguous Meshes, 24

Microplane Model M4 for Concrete. II: Algorithm and Calibration, 356

Multiobjective Optimization for Pavement Maintenance Programming, 1223

Multisegment Large Space Robot: Concept and Design, 32

Parallel Partitioned Inverse Method for Least-Squares Adjustment, 1175

Semiactive Control Strategies for MR Dampers: Comparative Study, 337

Simulation of Stochastic Wind Velocity Field on Long-Span Bridges, 240

Transient Dynamic Nonlinear Analysis Using MIMD Computer Architectures, 121

Unified Approach to Probabilistic and Possibilistic Analysis of Uncertain Systems, 384

Valve Closure in Graph-Theoretical Models for Slow Transient Network Analysis, 681

Alignment

GPS Alignment Surveys and Meridian Convergence, 1170

Modeling of Required Preview Sight Distance, 1177

Use of Vehicle-Collected Data to Calculate Existing Roadway Geometry, 1197

Alkalinity

Alkali-Silica Reaction of Concretes with Admixtures of Concrete, 269

Growth of Floating Aquatic Macrophytes in Alkaline Industrial Wastewaters, 540

Phosphate Inhibitors and Red Water in Stagnant Iron Pipes, 539

Allowable stress design

Comparison of ASD and LRFD Codes for Wood Members. I: Axial Loading, 1366

Comparison of ASD and LRFD Codes for Wood Members. II: Flexural Loading, 1367

Comparison of ASD and LRFD Codes for Wood Members. III: Connections, 1368

Fuzzy Genetic Algorithm for Optimization of Steel Structures, 1067

Alluvial channels

Method for Estimating Sediment Transport in Ice-Covered Channels, 106

Alluvium

Use of Piezocone to Predict Maximum Stiffness of Venetian Soils, 587

Altimeters

Topographic Mapping Using Topex Satellite Altimetry, 1172

Aluminum

Local Buckling of Aluminum Members: Testing and Classification, 1039

Ammonia

Animal Waste Containment in Anaerobic Lagoons Lined with Compacted Clays, 575

Automated Separation and Conductimetric Determination of Inorganic Nitrogen, 499

Biosensor for Detecting Odorous Compounds, 457

Conceptual Model of Aquatic Plant Decay and Ammonia Toxicity for Shallow Lakes, 426

Environmental Technology Verification Report for Ammonia Recovery Process, 1525

Postdigestion Struvite Precipitation Using a Fluidized Bed Reactor, 446

Scrape-and-Replace Method to Minimize Ammonium Transport from Animal Waste Lagoons, 1346

Amplitude
Conditional Simulation of a Class of Nonstationary Space-Time Random Fields, 287
Modeling Interactive Buckling of Plate Structures Using Special Elements, 395

Anaerobic digestion
Aerobic Thermophilic and Anaerobic Mesophilic Treatment of Sludge, 500
Anaerobic Thermophilic/Mesophilic Dual-Stage Sludge Treatment, 501
Characterization of Soluble Molecules From Thermochemically Pretreated Sludge, 451
Effect of pH and VFA Concentrations on Anaerobic Hydrolysis of Organic Solid Waste, 536

Anaerobic filters
Stability of High-Rate Anaerobic Systems. I: Performance under Shocks, 490

Anaerobic processes
Effect of Carbon Source on PCE Dehalogenation, 479
Full-Scale Demonstration of Improvement in Aeration Efficiency, 471
Metal Bioavailability and Trivalent Chromium Removal in ABR, 483
Modeling Natural Attenuation of Fuels with BIOPLUME III, 455
Molecular Mechanism of Granulation. II: Proton Translocating Activity, 453
Soluble Microbial Products in ABR Treating Low-Strength Wastewater, 431
Sorption Isotherms and Kinetics of Sediment Phosphorus in a Tropical Reservoir, 525
Stability of High-Rate Anaerobic Systems. I: Performance under Shocks, 490
Stability of High-Rate Anaerobic Systems II: Fuzzy Stability Index, 491
Treatment and Decolorization of Dyes in Anaerobic Baffled Reactor, 530
UASB Treatment of Tapioca Starch Wastewater, 547

Analysis
Analytical Description of Multidegree Bilinear Hysteretic System, 311
Automated Separation and Conductimetric Determination of Inorganic Nitrogen, 499
Evaluation of Traffic Parameters from Real Trajectories by Use of PCA, 1221
Inlet Pressure for Horizontal Tapered Laterals, 822
Large Deformation of Inelastic Large Space Frame. I: Analysis, 1065
Water Migration Phenomenon in Concrete in Postpeak Region, 309
Water Migration Phenomenon in Concrete in Prepeak Region, 308

Analytical techniques
Analytical Modeling of Contaminant Transport through Vadose and Saturated Soil Zones, 725
Analytical Solution for Plane Trusses with Equidistant Supports, 279
Experimental Validation of Smeared Analysis for Plain Concrete in Torsion, 1073
Integrating Constructability Tools into Constructability Review Process, 181
Phase Space Reduction in Stochastic Dynamics, 316
Smeared Crack Analysis for Plain Concrete in Torsion, 1072
Three-Dimensional Mathematical Model of Suspended Sediment Transport, 709
Unfrozen Water in Freezing and Thawing Soils: Kinetics and Correlation, 107

Anchorages
Anchorage of External Tendons in End Diaphragms, 80
Prediction of Tensile Capacity of Bond Anchorages for FRP Tendons, 149
Pullout Response of a Smooth Fiber with an End Anchorage, 360
Retrofitting of Deficient RC Cantilever Slabs Using GFRP Strips, 153

Anchoring
Stability of Ballasted Woody Debris Habitat Structures, 729

Anchors
Comprehensive Model for Embedded Plates, 1063
Design of Anchored Slabs in Spillway Stilling Basins, 701
The Penstock Puzzle, 1499
Scenic-Bridge Strengthening (Available in Structural Engineering Special Issue only), 1443

Angle section
Behavior and Design of Concentrically Loaded Pultruded Angle Struts, 1045

animals
Scrape-and-Replace Method to Minimize Ammonium Transport from Animal Waste Lagoons, 1346

Anisotropic soils
Finite Strain, Anisotropic Modified Cam Clay Model with Plastic Spin. I: Theory, 363
Finite Strain, Anisotropic Modified Cam Clay Model with Plastic Spin. II: Application to Piezocone Test, 364
Numerical Solution of 2D Free Surface Flow to Ditch Drains in Anisotropic Soils, 847
Short-Crested Wave-Induced Liquefaction in Porous Seabed, 597
Three-Dimensional Characterization and Simulation of Anisotropic Soil Fabric, 569

Anisotropy
Anisotropic Softening Model for Masonry Plates and Shells, 1114
Torsional Surface Waves in Nonhomogeneous Anisotropic Medium under Initial Stress, 378

Antennas
Deployable Structure of Curved Profile for Space Antennas, 34

Application methods
Soil Salinity Modeling Over Shallow Water Table. II: Application of LEACHC, 845

Approximation
Portmanteau Procedure for Model-Fit Evaluation, 673

Approximation methods
Approximating Wetted Perimeter in Power-Law Cross Section, 828
Buckling of Long Orthotropic Plates Including Higher-Order Transverse Shear, 390
New Point Estimates for Probability Moments, 291

Response Prediction of Geometrically Nonlinear Structures, 1150

Aquatic environment

Simulation of Transport Phenomena in Shallow Aquatic Environment, 666

Aquatic plants

Conceptual Model of Aquatic Plant Decay and Ammonia Toxicity for Shallow Lakes, 426

Growth of Floating Aquatic Macrophytes in Alkaline Industrial Wastewaters, 540

Tributary Refinements to Chesapeake Bay Model, 422

Aquifers

Closed-Form Solution for Coastal Aquifer Management, 1260

Explicit Aquifer Diffusivity Estimation Using Linearly Varying Stream Stage, 767

Influence Zone of Recharging-Dewatering Actions in Unconfined Aquifer, 829

Measuring Vertical Profiles of Hydraulic Conductivity with In Situ Direct-Push Methods, 498

Optimization Based Solution of Density Dependent Seawater Intrusion in Coastal Aquifers, 753

Simple Approximation for Flowing Well Problem, 823

Solution for a Stream Depletion Problem, 832

Transient Ditch Drainage of Two-Layered Soil, 816

Vapor Flow to Trench in Leaky Aquifer, 448

Arc furnace

Understanding Environmental Leachability of Electric Arc Furnace Dust, 416

Arches

Submerged Funicular Arches, 1071

Arching

Behavior of Transverse Confining Systems for Steel-Free Deck Slabs, 72

Architectural engineering

Architectural Engineering Curriculum at Illinois Institute of Technology, 48

Combined BS and MS Degree Program in Architectural Engineering, 49

Impact Resistance of Laminated Glass Using "Sacrificial Ply" Design Concept, 39

PAK Analysis Results for Building Architectural Engineering Licensure Exam, 41

Arid lands

Capillary Barriers: Design Variables and Water Balance, 617

Channel Infiltration in Solitario Canyon, Yucca Mountain, Nevada, 771

From Pikes Peak to Mars, 1435

Aromatic hydrocarbons

Biokinetic Parameter Estimation for ISB of PAH-Contaminated Soil, 447

Cosolvent-Enhanced Electrokinetic Remediation of Soils Contaminated with Phenanthrene, 468

Decreased Release of PAHs from Soils as a Result of Field Bioremediation, 1355

Effect of Nonionic Surfactants on Dissolution of Polycyclic Aromatic Hydrocarbons from Coal Tar, 1349

Enhanced Solubility and Biodegradation of Naphthalene with Biosurfactant, 480

Fate of Treated and Weathered Hydrocarbons in Soil—Long-Term Changes, 1345

Intracellular Polymers in Aerobic Sludge of Sequencing Batch Reactors, 492

Microstructure of Composite Material from High-Lime Fly Ash and RPET, 922

Remediation of Petroleum Refinery Waste Pond Contents: A Case Study, 1358

Arsenic

Arsenic Occurrence and Speciation in Municipal Ground-Water-Based Supply System, 461

Field-Scale Observations of Arsenic and Boron in Soil Irrigated with Drainwater, 840

Stability of Metal-Arsenic Solids in Drinking Water Systems, 1342

Stabilization of Arsenic- and Barium-Rich Glass Manufacturing Waste, 435

Treatment of Arsenic-Contaminated Soils. I: Soil Characterization, 526

Treatment of Arsenic-Contaminated Soils. II: Treatability Study and Remediation, 527

Artesian aquifers

Simple Method for Confined-Aquifer Parameter Estimation, 871

Artificial intelligence

Distributed Multi-Reasoning Mechanism to Support Conceptual Structural Design, 1083

Reducing Prediction Error by Transforming Input Data for Neural Networks, 124

Simplified Fuzzy ARTMAP as Pattern Recognizer, 122

Asbestos

Walled In (Available in Geo-Environmental Special Issue only), 1426

ASCE Awards & Prizes

Competence or Collapse, 7

Design Guide for Partially Restrained Composite Connections, 2

Diffusional Mass Transfer at Sediment-Water Interface, 15

Ethics: A Design Responsibility, 5

The Ethics of Contributions, 8

High-Strength Concrete Columns with Square Sections under Concentric Compression, 14

/iDiscussion of: /h Characterization of Stream Meanders for Stream Restoration , 9

The First Professional Degree: A Historic Opportunity, 986

ASCE Younger Members
Competence or Collapse, 7

Ashes
Applications for PFBC Residues, 951
Use of Papermaking Sludge as New Material, 954
Use of Pulverized Fuel Ash in Trench Backfill, 943

Asphalt mix design
Design and Analysis System for Thermal Cracking in Asphalt Concrete, 1215
Uniaxial Experiments on Idealized Asphalt Mixes, 947
Volumetric and Mechanical Performance Properties of Superpave Mixtures, 944

Asphalt pavements
Analysis and Design Optimization of Flexible Pavement, 1198
Design and Analysis System for Thermal Cracking in Asphalt Concrete, 1215
Flat and Elongated Aggregates in Superpave Regime, 930
Volatile Organic Compounds in Storm Water from a Parking Lot, 545

Asphalt tests
Road Test, 1455

Asphaltic concrete
Construction Use of Vitrified Chromium-Contaminated Soils, 1351
Continuum Damage Mechanics-Based Fatigue Model of Asphalt Concrete, 928
Development of a Pavement Rutting Model from Experimental Data, 1214
Importance of Invasive Measures in Assessment of Existing Pavements, 977
Use of Phosphate Waste as Fillers in Mixtures to Improve Their Resistance to Deformation, 1225

Asphalts
Composite Asphalt Binders: Effect of Modified RPE on Asphalt, 929
Road Test, 1455
Temperature Related Visco-Elastoplastic Properties of Asphalt Mixtures, 1184
Weekend Closure for Construction of Asphalt Overlay on Urban Highway, 209

Asymmetric structures
Behavior of Composite Slim Floor Structures in Fire, 1094
Triply Coupled Vibration of Asymmetric Wall-Frame Structures, 1110

Asymmetry
New Method for 3D and Asymmetrical Slope Stability Analysis, 637

Asymptotic series
Three-Dimensional Elasticity Solutions of Laminated Annular Spherical Shells, 348

Australia
Border Irrigation Field Experiment. I: Water Balance, 826
Border Irrigation Field Experiment. II: Salt Transport, 827

Autocorrelation
Time Series Modeling for Predicting Spatially Variable Infiltration, 854

Automation
Automated Rebar Constructability Diagnosis, 219
Automatic Monitoring of Slope Deformations Using Geotechnical Instruments, 1169
Automatic Road Detection in Grayscale Aerial Images, 119
Classification of Defects in Sewer Pipes Using Neural Networks, 805
Collaborative Planning and Scheduling of Interrelated Design Changes, 45
Cost/Benefits of Robotics in Infrastructure and Environmental Renewal, 798
Designs and Implementations of Automated Systems for Pavement Surface Distress Survey, 797
Evaluation of Mobile Mapping Systems for Roadway Data Collection, 131
Graphical Control Interface for Construction and Maintenance Equipment, 196
Issues for Construction of 300-mm Fab, 227
Planning Criteria for Automated People Movers: Defining the Issues, 1255

Automobile safety standards
Performance Problems and Structural Retrofit Analysis of Existing BCTs, 973

Automobiles
Biological Removal of Gaseous VOCs from Automotive Painting Operations, 494
Traffic Network and Distribution of Cars: Maximum-Entropy Approach, 1188
Volatile Organic Compounds in New Automobiles: Screening Assessment, 523

Auto-regressive moving-average model
Closed Loop Predictive Optimal Control Algorithm Using ARMA Models, 315
Drought Occurrence Probabilities and Risks of Dependent Hydrologic Processes, 773

Axial compression
Development and Performance Evaluation of Interlocking-Block Masonry, 42
Discrete Bracing Analysis for Light-Frame Wood-Truss Compression Webs, 1123
Evolution of Sand Microstructure during Shear, 561
Vibration of Vehicle on Compressed Rail on Viscoelastic Foundation, 381

Axial forces
3D Analyses of Buildings under Vertical Component of Earthquakes, 1135
Second-Order Axial Deflections of Imperfect 3D Beam-Column, 389
Strength of Concrete Filled Steel Box Columns Incorporating Local Buckling, 1038

Axial loads
Axial Testing of Rectangular Column Models Confined with Composites, 159
Axisymmetric Wrinkling of Cylinders with Finite Strain, 293
Buckling of Flexural-Shear Plates, 1164
Comparison of ASD and LRFD Codes for Wood Members. I: Axial Loading, 1366
Design Equation for Overlap Tubular K-Joints under Axial Loading, 1090
Experimental and Numerical SCF Studies of Multiplanar Tubular XX-Joint, 1148
Testing the Load (Available in Geoenvironmental Engineering Special Issue only), 1460
Vertically Loaded Single Piles in Gibson Soil, 568

Axial strain
Field Tests on HDPE Pipes Installed Using Horizontal Directional Drilling, 810

Axisymmetry
Axisymmetric Submerged Intrusion in Stratified Fluid, 696
Unsymmetrically Loaded Cylindrical Tank on Elastic Foundation, 396

Azimuth
GPS Alignment Surveys and Meridian Convergence, 1170

Backfills
Use of Pulverized Fuel Ash in Trench Backfill, 943

Backwater profiles
Open-Channel Capacity Determination Using Hydraulic Performance Graph, 665

Bacteria
Bacterial Transport in NAPL-Contaminated Porous Media, 484
Comparison of Mixed Cultures Based on Activity, 535
Insignificant Role of Hydrodynamic Dispersion on Bacterial Transport, 464
Molecular Mechanism of Granulation. I: H+ Translocation-Dehydration Theory, 452
Molecular Mechanism of Granulation. II: Proton Translocating Activity, 453

Ballast
Model Testing of Two-Layer Railway Track Ballast, 581
Stability of Ballasted Woody Debris Habitat Structures, 729

Bangladesh
River Stage Forecasting in Bangladesh: Neural Network Approach, 112

Bank erosion
Numerical Analysis of River Channel Processes with Bank Erosion, 675
Soil Bioengineering: Challenges for Planning and Engineering, 1250
Walled In (Available in Geo-Environmental Special Issue only), 1426

Bank stabilization
Soil Bioengineering: Challenges for Planning and Engineering, 1250
Walled In (Available in Geo-Environmental Special Issue only), 1426

Barriers
Capillary Barriers: Design Variables and Water Balance, 617
Environmental Geotechnics, 1524
Evaluation of the Federal Highway Administration's Traffic Noise Model, 1242
Experimental Study of Horizontal Barrier Formation by Colloidal Silica, 506
Foundry Green Sands as Hydraulic Barriers: Laboratory Study, 651
Interactions of Horizontal Porous Flexible Membrane with Waves, 1328

Verdict Rendered, 1501

Sheets
Deformation in Concrete with External CFRP Sheet Reinforcement, 154

Shells
Anisotropic Softening Model for Masonry Plates and Shells, 1114
Static-Dynamic Analyses of Toroidal Shells, 31

Ships
Effects from Supercritical Ship Operation on Inland Canals, 1314
Optimizing Deployment of Shiploaders at Bulk Export Terminal, 1334

Shoaling
Reservoir Model of Ebb-Tidal Shoal Evolution and Sand Bypassing, 1335

Shock waves
Phase Transitions in Nonequilibrium Traffic Theory, 1176

Shore protection
Oil Transport in Surf Zone, 728

Shoreline changes
Shoreline Changes behind Detached Breakwater, 1306

Shoring
Deformations during Cut-and-Cover Construction of MUNI Metro Turnback Project, 584

Shotcrete
Fiber Reinforced Wet-Mix Shotcrete under Impact, 925
Modeling of Early-Age Creep of Shotcrete. I: Model and Model Parameters, 274
Modeling of Early-Age Creep of Shotcrete. II: Application to Tunneling, 275

Shrinkage
Deflection of Cracked RC Beams under Sustained Loading, 1080
Influence of Reinforcing Bars on Shrinkage Stresses in Concrete Slabs, 400
Predicting Shrinkage Stress Field in Concrete Slab on Elastic Subgrade, 244
Sensitivity Analysis of Time-Dependent Behavior in PSC Box Girder Bridges, 1019

Shrinkage cracking
Influence of Specimen Size/Geometry on Shrinkage Cracking of Rings, 251

Sight distances
Evaluation of Highway Consistency and Safety: Practical Application, 1201
Modeling of Required Preview Sight Distance, 1177

Sign supports
Impact Finite-Element Analysis of Slip-Base Sign Support Mechanism, 1196
Smart Sign Support, 1484

Signalized intersections
Effect of Vehicle Type on Capacity of Signalized Intersections, 1241
Probabilistic Approach to Implementing Traffic Signal Warrants, 1219

Signs
Smart Sign Support, 1484

Silica
Alkali-Silica Reaction of Concretes with Admixtures of Concrete, 269
Experimental Study of Horizontal Barrier Formation by Colloidal Silica, 506

Silos
Compression Tests on Cylinders with Circumferential Weld Depressions, 288

Stresses in Inclined Planar Silos, 1096

Silts

Strength of "Undisturbed" versus Reconstituted Silt and Silty Sand Specimens, 609

Silty soils

Influence of Freezing Temperature on Hydraulic Conductivity of Silty Clay, 567

Liquefaction Testing of Stratified Silty Sands, 570

Shear Strength and Stiffness of Silty Sand, 594

Simulation

Accuracy of Neural Network Approximators in Simulation-Optimization, 1261

Application Framework for Development of Simulation Tools, 130

Conditional Simulation of a Class of Nonstationary Space-Time Random Fields, 287

Development of an Experience Database for Truck Loading Operations, 195

Equivalent Beam Method for Trusses, 1369

Geotechnical Behavior of JSC-1 Lunar Soil Simulant, 33

Laboratory Simulation of Wind Vibrations in Roadside Structures, 1138

Simulation of Construction of RCC Dams. I: Temperature and Aging, 1119

Simulation of Construction of RCC Dams. II: Stress and Damage, 1120

Simulation of Ground Water Flow in Steep Basin with Shallow Surface Soil, 716

Simulation of Stochastic Wind Velocity Field on Long-Span Bridges, 240

Soil Salinity Modeling Over Shallow Water Table. I: Validation of LEACHC, 844

Stochastic Construction Time-Cost Trade-Off Analysis, 125

System Dynamics Modeling of Reservoir Operations for Flood Management, 134

Wind Mixing in Temperature Simulations for Lakes and Reservoirs, 17

Simulation models

Application Example for Evaluating Networks Considering Correlation, 229

Defining Probability Distribution Function for Construction Simulation, 199

Enhancements of CORSIM Model in Simulating Transit Operations, 1227

Model for Evaluating Networks under Correlated Uncertainty—NETCOR, 228

Model of Water Application under Pivot Sprinkler. II: Calibration and Results, 863

Neural Network-Based Simulation-Optimization Model for Reservoir Operation, 1262

Pedestrian Speed/Flow Relationships for Walking Facilities in Hong Kong, 1220

Probability Distribution Functions for Construction Simulation, 205

Simplified CPM/PERT Simulation Model, 197

Simplifying Simulation Modeling through Integration with 3D CAD, 230

Simulating Elevation and Infiltration in Level-Basin Irrigation, 825

Simulation of Hurricane Risk in the U.S. Using Empirical Track Model, 1137

Singapore

Solid Ground, 1480

Sinkholes

Case Closed, 1453

Site evaluation

Computer Simulation of Earthquake Effects, 1512

Innovations and Applications in Geotechnical Site Characterization, 1543

Reducing Uncertainty in Site Characterization Using Bayes Monte Carlo Methods, 512

Use of Geophysical Methods in Construction, 1572

Site investigation

Deep Excavation in Shale for a Hydroelectric Facility, 1379

Engineering Reliability Assessment of Contaminant Removal by Pneumatic Fracturing, 1341

Evaluating Safety of Concrete Gravity Dam on Weak Rock: Scott Dam, 592

Recommended Readings for Environmental Site Investigators, 1338

Use of Geophysical Methods in Construction, 1572

Site selection

Location of Financial, Insurance, and Real Estate Firms in Istanbul, 1249

Size

Buoyant Velocity of Spherical and Nonspherical Bubbles/Droplets, 734

Influence of Specimen Size/Geometry on Shrinkage Cracking of Rings, 251

Stilling Basins for Pipe Outlets Using Wedge-Shaped Splitter Block, 839

Size effect

Compression Failure of Beams Made of Different Concrete Types and Sizes, 1022

Effect of Block Size and Joint Geometry on Jointed Rock Hydraulics and REV, 343

Fracture Mechanics of ASR in Concretes with Waste Glass Particles of Different Sizes, 267

Probabilistic Nonlocal Theory for Quasibrittle Fracture Initiation and Size Effect. I: Theory, 259

Probabilistic Nonlocal Theory for Quasibrittle Fracture Initiation and Size Effect. II: Application, 260

Trip Generation Rates of Correctional Facilities, 1245

Skewed structures

Discharge Characteristics of Skew Sluice Gates, 860

A New Skew, 1465

Skewness

Observations on Flow around Bridge Abutment, 246

Skew-Dependent Detection of Change of Central Tendency in Hydrologic Data, 748

Skid resistance

Use of Friction and Texture in Pavement Performance Modeling, 1207

Skin, structural members

A Whole New Experience, 1475

Slabs

Behavior and Modeling of Reinforced Composite Slab in Tension, 1086

Cyclic Testing of Simple Connections Including Effects of Slab, 1004

Design of Anchored Slabs in Spillway Stilling Basins, 701
Overload and Ultimate Load Behavior of Posttensioned Slab Bridge, 73
Response of PCC Pavements due to Vehicle-Road Interaction, 1206
Retrofit of Pre-Northridge Moment-Resisting Connections, 1049
Retrofitting of Deficient RC Cantilever Slabs Using GFRP Strips, 153
Values of *K* for Slab on Winkler Foundation, 595

Sliding
Nonlinear Coupled Seismic Sliding Analysis of Earth Structures, 644
Nonlinear Sliding Mode Control of Seismic Response of Building Frames, 280
Seismic Safety of Gravity Dams: From Shake Table Experiments to Numerical Analyses, 1058

Slip
Disturbed Stress Field Model for Reinforced Concrete: Formulation, 1121
Local Bond-Slip Relationship for FRP Reinforcement in Concrete, 147
Pullout Response of a Smooth Fiber with an End Anchorage, 360
Reinforced Concrete Fiber Beam Element with Bond-Slip, 1074

Slip surface
Residual Strength and Fracture Energy of Soft Rock from Plane-Strain Testing, 633

Slipping
Slippage of Neoprene Bridge Bearings, 81

Slope stability
Assessment of Stability of Slopes under Drawdown Conditions, 593
Behavior of Rock in Slopes, 615
Displacements of Reinforced Slopes Subjected to Seismic Loads, 616
Influence of Stress State on Soil-Water Characteristics and Slope Stability, 565
Municipal Solid Waste Slope Failure. I: Waste and Foundation Soil Properties, 589
Municipal Solid Waste Slope Failure. II: Stability Analyses, 590
New Method for 3D and Asymmetrical Slope Stability Analysis, 637
Performance of Geosynthetic Reinforced Slopes at Failure, 4
Probabilistic Slope Stability Analysis with Stochastic Soil Hydraulic Conductivity, 549
Secondary Reinforcement for Slopes, 650
Significance of Soil Dilatancy in Slope Stability Analysis, 556
Slope Failure in Weathered Claystone and Siltstone, 625
Slope Stability 2000, 1560
Slope Stability of Geosynthetic Clay Liner Test Plots, 10

Slope stabilization
Slope Stability 2000, 1560

Slopes
Automatic Monitoring of Slope Deformations Using Geotechnical Instruments, 1169
Construction Slopes for Beach Nourishment Projects, 1305
The Curious Case of Mobility Reversal in Sediment Mixtures, 670
Deep Excavation in Shale for a Hydroelectric Facility, 1379
Effect of Wind on Precipitation Intercepted by Steep Mountain Slopes, 784
Performance of Geosynthetic Reinforced Slopes at Failure, 4
Slope Stability 2000, 1560

Sludge
Electrocoagulation and Electroflotation of Restaurant Wastewater, 509
Molecular Mechanism of Granulation. I: H+ Translocation-Dehydration Theory, 452
Molecular Mechanism of Granulation. II: Proton Translocating Activity, 453
Reuse of Industrial Sludge as Pelletized Aggregate for Concrete, 436
UASB Treatment of Tapioca Starch Wastewater, 547
Use of Papermaking Sludge as New Material, 954
VFA Production in Thermophilic Aerobic Digestion of Municipal Sludges, 450

Sludge treatment
Aerobic Thermophilic and Anaerobic Mesophilic Treatment of Sludge, 500
Anaerobic Thermophilic/Mesophilic Dual-Stage Sludge Treatment, 501
Characterization of Soluble Molecules From Thermochemically Pretreated Sludge, 451

Slurry trenches
Effective Analysis of Diaphragm Walls, 1522

Small business
Meeting the Staffing Challenge, 1486
Small Firms Check In, 1476

Smoke control
Natural Smoke Filling in PolyU/USTC Atrium, 50

Snowmelt
Representation of Snow in Urban Drainage Models, 786

Social aspects
Leadership and Organizational Vision in Managing a Multiethnic and Multicultural Project Team, 907
A Long-Term Strategy for Latin America, 908

Social impact
Disasters as Agents of Social Change in Recovery and Reconstruction, 1390
Emotional Injury and the Northridge, California Earthquake, 1406
U.S. Participation in International Decade for Natural Disaster Reduction, 1381

Social organization
Leadership and Organizational Vision in Managing a Multiethnic and Multicultural Project Team, 907

Social values
Ethical Maturity and Successful Leadership, 990

Soft soils
Soil-Cement and Other Construction Practices in Geotechnical Engineering, 1563

Softening
Anisotropic Softening Model for Masonry Plates and Shells, 1114

Soil analysis
In Situ Measurement of Damping Ratio Using Surface Waves, 596
Subsurface Soil-Geology Interpolation Using Fuzzy Neural Network, 611
Treatment of Arsenic-Contaminated Soils. I: Soil Characterization, 526

Soil cement
Soil-Cement and Other Construction Practices in Geotechnical Engineering, 1563

Soil conditions
Inelastic Displacement Ratios for Structures on Firm Sites, 1130

Soil dynamics
Liquefaction Testing of Stratified Silty Sands, 570

Weather Effects on Daily Water Use in New York City, 782

Water supply systems
3D Numerical Modeling of *Microcystis* Distribution in Water Reservoir, 519
EXPLORE–Hybrid Expert System for Water Networks Management, 1263
Irrigation District Service in Western United States, 853
Leak Detection and Calibration Using Transients and Genetic Algorithms, 1282
Long Time-Series Simulation of Water Quality in Distribution System, 1275
Optimal Operation of Water Distribution System Pumps with Water Quality Considerations, 1276
Optimization of Regional Water Distribution System with Blending Requirements, 1278
Parallel Computing in Water Network Analysis and Leakage Minimization, 1281
Storage Tank Management to Improve Drinking Water Quality: Case Study, 1277
Using Water-Distribution System Modeling to Assist Epidemiologic Investigations, 1274
Water Distribution Management in Small West African Canal Systems, 857

Water table
Soil Salinity Modeling Over Shallow Water Table. I: Validation of LEACHC, 844
Soil Salinity Modeling Over Shallow Water Table. II: Application of LEACHC, 845
Transient Ditch Drainage of Two-Layered Soil, 816

Water tanks
Designing a General Neurocontroller for Water Towers, 310
Storage Tank Management to Improve Drinking Water Quality: Case Study, 1277
Tests on Reinforced Partially Prestressed Concrete Tank Walls, 1076

Water temperature
Improving Forecasts of Nile Flood Using SST Inputs in TFN Model, 787
Linear Air/Water Temperature Correlations for Streams during Open Water Periods, 779
Stream Temperature Dynamics in Upland Agricultural Watersheds, 467

Water transportation
Kinetics of THM Species in Finished Drinking Water, 1259

Water treatment
Arsenic Occurrence and Speciation in Municipal Ground-Water-Based Supply System, 461
Contaminant Adsorption and Oxidation Via Fenton Reaction, 476
Conveyance of Residuals from Water and Wastewater Treatment, 1516
Desert Wetlands, 1483
Diatomaceous Earth Filtration for Safe Drinking Water, 1520
Enhanced Ripening of Slow Sand Filters, 548
Fluorescence Technique for Rapid Identification of DOM Fractions, 420
Gamma Irradiation for Inactivation of *C. parvum, E. coli*, and Coliphage MS-2, 496
Ground Water under Direct Influence of Surface Water, 465
Improvement of Submerged Biofilter Process by Bioelectrochemical Method, 470
Leaching of Metals from Water Treatment Plant Residuals, 1357
Optimizing Water Treatment with Two-Stage Coagulation, 472
Storm Water Pollutant Removal by Two Wet Ponds in Bellevue, Washington, 441

Water use
Efficient and Equitable Impact Fees for Urban Water Systems, 1264
Long-Term Evapotranspiration from Coastal Avocado/Citrus Orchard, 814
Plant Water Use and Crop Curves for Hybrid Poplars, 842
Weather Effects on Daily Water Use in New York City, 782

Water waves
Analysis of Scour around a Group of Vertical Piles in the Field, 1324
Coastal Processes in Tidal Seas, 1511
Determination of Inverse Depths Using Direct Boussinesq Modeling, 1323

Dynamic Response of Soft Poroelastic Bed to Nonlinear Water Wave— Boundary Layer Correction Approach, 370
Effect of Bed Roughness on Time-Mean Drift Induced by Waves, 1301
Influence of Currents on Equilibrium Range Spectra of Wind Waves, 1308
Interactions of Horizontal Porous Flexible Membrane with Waves, 1328
Laminar Poroelastic Media Flow, 282
Nonlinear Wave Group Evolution in Shallow Water, 1325
Review of Multidirectional Active Wave Absorption Methods, 1309
Towers in Motion (available in Structural Engineering Special Section only), 1477
Tsunami Features of Solid Block Underwater Landslides, 1316
Waves inn Rectangular Inlet with Reflecting or Absorbing Walls, 1333

Waterborne diseases
Ground Water under Direct Influence of Surface Water, 465

Waterfront facilities
On the New Waterfront, 1423

Watershed management
ANSWERS-2000: Non-Point-Source Nutrient Planning Model, 533
Channel Infiltration in Solitario Canyon, Yucca Mountain, Nevada, 771
Comparison of ANNs and Empirical Approaches for Predicting Watershed Runoff, 1272
Statewide Non-Point-Source Pollution Assessment Methodology, 1271
Watershed Management and Operations Management 2000, 1574

Watersheds
Application of Fluorescence Technique for Rapid Identification of DOM Fractions in Source Waters, 532
Grid-Size Effects on Surface Runoff Modeling, 744
NEXRAD Radar for Flood Prediction in Houston, 774
Precipitation-Runoff Modeling Using Artificial Neural Networks and Conceptual Models, 760
Simple Nonlinear Rainfall-Runoff Model, 746
Use of Total Coliform Test in Watershed Monitoring with Respect to Atypicals, 423
Using GIS to Determine Extent of Gauged Streams in a Region, 764
Watershed Management and Operations Management 2000, 1574

Wave action
Analysis of Scour around a Group of Vertical Piles in the Field, 1324
Numerical Solution for Trapped Modes around Inclined Venice Gates, 1327
Shoreline Changes behind Detached Breakwater, 1306
Short-Crested Wave-Induced Liquefaction in Porous Seabed, 597

Wave diffraction
Solitary Wave Interaction with Porous Breakwaters, 1336

Wave dispersion
New Solution for Directional Wave Analysis in Reflective Wave Fields, 1319

Wave energy
Evaluation of Sonochemical Destruction of PCE in In Situ Flushing Waste Fluids, 531
Perforated Wall Breakwater with Internal Horizontal Plate, 302
Waves inn Rectangular Inlet with Reflecting or Absorbing Walls, 1333

Wave forces
Numerical Simulation of Impact of Bores against Inclined Walls, 742
Reconstruction of Subarctic Lake Levels over Past Centuries Using Tree Rings, 110
Response of Inhomogeneous Seabed around Buried Pipeline under Ocean Waves, 278
Wave Impact on Wall Using Pressure-Impulse Theory. I. Trapped Air, 1320
Wave Impact on Wall Using Pressure-Impulse Theory. II. Porous Berm, 1321
Wave Interactions with Perforated Breakwater, 1326

Wave generation
Effects from Supercritical Ship Operation on Inland Canals, 1314
Review of Multidirectional Active Wave Absorption Methods, 1309
Trapping and Generation of Waves by Vertical Porous Structures, 371

Wave groups
Nonlinear Wave Group Evolution in Shallow Water, 1325
Short-Wave and Wave Group Scattering by Submerged Porous Plate, 368

Wave height
Dam-Break Surges with Floating Debris, 688
Joint Distribution of Wave Heights and Periods in Waters of Any Depth, 1318

Wave measurement
New Directions in Concrete Health Monitoring Technology, 332

Wave pressure
Wave Impact on Wall Using Pressure-Impulse Theory. I. Trapped Air, 1320
Wave Impact on Wall Using Pressure-Impulse Theory. II. Porous Berm, 1321

Wave propagation
Experiments on Flood-Wave Propagation in Compound Channel, 700
Ferromagnetic Inclusions in Geomaterials: Implications, 566
Propagation of Waves and Dissolved Compounds in Sewer, 404
Seismic Wave Propagation in Elastic-Viscoplastic Shear Layers, 571
Short-Wave and Wave Group Scattering by Submerged Porous Plate, 368
Torsional Surface Waves in Nonhomogeneous Anisotropic Medium under Initial Stress, 378
Tsunami Features of Solid Block Underwater Landslides, 1316

Wave reflection
Cross-Sectional Modes in Impact-Echo Testing of Concrete Structures, 1025
New Solution for Directional Wave Analysis in Reflective Wave Fields, 1319
Perforated Wall Breakwater with Internal Horizontal Plate, 302
Solitary Wave Interaction with Porous Breakwaters, 1336
Wave Interactions with Perforated Breakwater, 1326

Wave runup
Boussinesq Modeling of Wave Transformation, Breaking, and Runup. I: 1D, 1303
Boussinesq Modeling of Wave Transformation, Breaking, and Runup. II: 2D, 1304
Numerical Simulation of Impact of Bores against Inclined Walls, 742
Wave Interactions with Perforated Breakwater, 1326

Wave spectra
Influence of Currents on Equilibrium Range Spectra of Wind Waves, 1308
New Solution for Directional Wave Analysis in Reflective Wave Fields, 1319

Wave tanks
Nonlinear Wave Group Evolution in Shallow Water, 1325

Wave velocity
Dam-Break Surges with Floating Debris, 688
Liquefaction Resistance of Soils from Shear-Wave Velocity, 645

Wavelength
Joint Distribution of Wave Heights and Periods in Waters of Any Depth, 1318

Waves
Exterior Bathymetric Effects in Elliptic Harbor Wave Models, 1307
On Elimination of Exposure D along Hurricane Coastline in ASCE 7, 1061
Prediction of Sand Ripple Geometry Under Waves and Currents, 1300
Supercritical Flow in Bend Manhole, 821
Wavelet-Based Approach for Structural Damage Detection, 323

Weather data
Weather Effects on Daily Water Use in New York City, 782

Webs
Behavior of Curved I-Girder Webs Subjected to Combined Bending and Shear, 75
Effects of Longitudinal Stiffeners on Curved I-Girder Webs, 76
High-Performance Hybrid, 1458

Weight
Development of Truck Weight Regulations Using Bridge Reliability Model, 89
Effect of Changing Truck Weight Regulations on U.S. Bridge Network, 90
Phosphate Inhibitors and Red Water in Stagnant Iron Pipes, 539
Super Bar Theory and BP System in Super Span Flat Space Frames, 1152

Weighting functions
Weighted Integral SFEM Including Higher Order Terms, 344

Weirs
Aeration Performance of Rectangular Planform Labyrinth Weirs, 459
Simultaneous Flow over and Under a Gate, 841

Welded joints
Compression Tests on Cylinders with Circumferential Weld Depressions, 288
Residual Stresses in Welded Moment Frames and Implications for Structural Performance, 1034
Stress Concentrations in Tubular DT-Joints for Fatigue Design, 1147
The W1 Issue. II: UT Reliability for Inspection of T-Joints with Backing, 1002

Welding
Effects of Connection Fractures on SMRF Seismic Drift Demands, 1014
Fracture Toughness Demands in Welded Beam-Column Moment Connections, 1010
Parametric Tests on Unreinforced Steel Moment Connections, 1005

Welds
Cyclic Testing of Steel Moment Connections Rehabilitated with RBS or Welded Haunch, 1007
Fatigue-Life Evaluation of Steel Post Structures. II: Experimentation, 1037
Residual Stresses in Welded Moment Frames and Implications for Structural Performance, 1034
Seismic Rehabilitation Design of Steel Moment Connection with Welded Haunch, 1008
The W1 Issue. I: Extent of Weld Fracturing during Northridge Earthquake, 1001

Well performance
Performance of Relief Well Systems Along Mississippi River Levees, 620

Wells
Neural Networks for Agrichemical Vulnerability Assessment of Rural Private Wells, 761
Pitot-Static Tube System to Measure Discharges from Wells, 684
Rate and Volume of Stream Depletion Due to Pumping, 861
Simple Approximation for Flowing Well Problem, 823
Solution for a Stream Depletion Problem, 832
Well-Purging Protocols for Sampling Dissolved Petroleum Hydrocarbons, 1344

Wetlands
Desert Wetlands, 1483

White noise
New Light on Response of Linear Systems Subjected to Random Nonstationary Filtered Inputs, 398
Noisy Nonlinear Motions of Moored System. II: Experimental Study, 1312

Wind direction
Effect of Wind on Precipitation Intercepted by Steep Mountain Slopes, 784

Wind forces
3D Flutter Analysis of Bridges by Spline Finite-Strip Method, 1139

Bridge Deck Aeroelastic Admittance Revisited, 55
Building Wind Damage Prediction and Mitigation Using Damage Bands, 1405
Fatigue-Life Evaluation of Steel Post Structures. I: Background and Analysis, 1036
Fatigue-Life Evaluation of Steel Post Structures. II: Experimentation, 1037
GPS Measurement of Wind-Induced Suspension Bridge Girder Displacements, 1157
Increased Damping in Cantilevered Traffic Signal Structures, 1059
Laboratory Simulation of Wind Vibrations in Roadside Structures, 1138
Model of Water Application under Pivot Sprinkler. I: Theoretical Grounds, 862
Model of Water Application under Pivot Sprinkler. II: Calibration and Results, 863
On Elimination of Exposure D along Hurricane Coastline in ASCE 7, 1061
Prediction of Ozone Formation Based on Neural Network, 487
Special Studies for Vasco da Gama Bridge, 83
The Tornado Problem: Forecast, Warning, and Response, 1395
Variation of Wind-Driven Rain Intensity with Building Orientation, 53
Wind-Induced Peak Bending Moments in Low-Rise Building Frames, 347

Wind loads
3D Wind-Excited Response of Slender Structures: Closed-Form Solution, 1105
Equivalent Static Buffeting Loads on Structures, 1111
Internal Pressures and Cladding Net Wind Loads on Full-Scale Low-Rise Building, 1060
Theories of Aerodynamic Forces on Decks of Long Span Bridges, 56
Wind Loads on Low Building Roofs: A Stochastic Perspective, 1106

Wind speed
Effect of Wind on Precipitation Intercepted by Steep Mountain Slopes, 784
Hurricane Wind Field Model for Use in Hurricane Simulations, 1136
Optimization of Runway Orientation, 1205
Simulation of Hurricane Risk in the U.S. Using Empirical Track Model, 1137

Wind tunnel test
Into the Tunnel, 1452

Wind velocity
Simulation of Stochastic Wind Velocity Field on Long-Span Bridges, 240

Wind waves
Influence of Currents on Equilibrium Range Spectra of Wind Waves, 1308

Window glass
Simplified Window Glass Design Procedure, 51

Winter
Estimating Winter Streamflow Using Conceptual Streamflow Model, 108

Wire products
Accelerated Corrosion and Embrittlement of High-Strength Bridge Wire, 918

Wire rope
Frictional Dissipation in Axially Loaded Simple Straight Strands, 318
General Thin Rod Model for Preslip Bending Response of Strand, 255

Women
Comparison of Men's and Women's Careers in U.K. Construction Industry, 993

Wood
Comparison of ASD and LRFD Codes for Wood Members. I: Axial Loading, 1366
Comparison of ASD and LRFD Codes for Wood Members. II: Flexural Loading, 1367

Wood products
Correlating Off-Axis Tension Tests to Shear Modulus of Wood-Based Panels, 1070

Wooden structures
Comparison of ASD and LRFD Codes for Wood Members. III: Connections, 1368
Conceptual Model for Temporary Bracing of Metal-Plate-Connected Wood Trusses, 1365
Discrete Bracing Analysis for Light-Frame Wood-Truss Compression Webs, 1123
Large-Scale Testing of Two Flat Roof Assemblies Insulated with Cellulose, 38
Load Sharing Effects in Light-Frame Wood-Truss Assemblies, 1154
Mechanics of Plain and Retrofitted Traditional Timber Connections, 1155
Model for Dynamic Analysis of Wood Frame Shear Walls, 350
Splice Failures in Split-Ring Connected Wood Roof Trusses: Case Study, 970
Stability of Ballasted Woody Debris Habitat Structures, 729

Working conditions
Commercial Diving Operations in Construction, 225

World Wide Web
Failure Analysis Case Study Information Disseminator, 974
Implementation Issues in Project Web-Sites: A Practitioner's Viewpoint, 887
Java-Based Regulation Broker, 123
Recommended Resources, 1451

Wrought iron
1869 Whipple Bridge Back across Enlarged Erie Canal, 1372

X-ray diffraction
Assessment of Concrete in Sulfate Soils, 969

Yield
Application of Lade's Criterion to Cam-Clay Model, 253
Conditional Distributions of Ideal Reservoir Storage Variables, 749
Governing Yield Modes for Common Bolted and Nailed Wood Connections, 1362

Yield line method
Limit Analysis of Ultimate Strength of Tubular X-Joints, 1089

Yield stress
Coarse-Grained Debris-Flows: Hysteresis and Time-Dependent Rheology, 741
Effect of Heat Straightening on Material Properties of Steel, 938

Young's modulus
Stiffness Nonlinearity of Three Sands, 638

Zeolite
Hydrothermal Solidification of Wastes with Formation of Zeolites, 952

Zoning
Efficient and Equitable Impact Fees for Urban Water Systems, 1264
